## DIMENZIJE KUĆICE

\*Veličina zaokružena na najbližu stopu

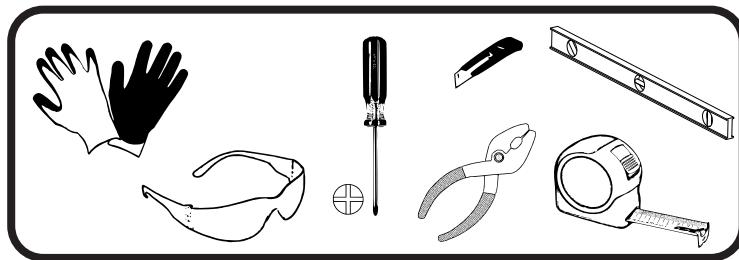

<b>Veličina temeljne ploče</b>	<b>74" x 57"</b> 188,0 cm x 144,8 cm
--------------------------------	---

Za pravilnu konstrukciju temelja pogledajte stranicu 11

Cca. * veličina	Skladišno područje	Vanjske dimenzije (od ruba krova do ruba krova)			Dimenzije unutrašnjosti (od zida do zida)			Otvor vrata		
6' x 5'	27 Sq. Ft. 158 Cu. Ft.	širina 76 1/4"	dubina 59 1/2"	visina 74 7/8"	širina 71 1/4"	dubina 54 1/4"	visina 73 5/8"	širina 32"	visina 65"	
1,8 m x 1,5 m	2,5 m <sup>2</sup>	4,5 m <sup>3</sup>	193,7 cm	151,1 cm	190,2 cm	181,0 cm	137,8 cm	187,0 cm	81,3 cm	165,1 cm

\* Više informacija o sigurnosti potražite unutra.

- Morate biti oprezni pri rukovanju različitim dijelovima kućice jer neki dijelovi imaju oštре rubove.

- Nemojte montirati kućicu ako neki dijelovi nedostaju jer ako kućicu ostavite djelomično montiranom, slab vjetar mogao bi ju ozbiljno oštetiti.
- Nemojte montirati kućicu po vjetrovitom vremenu jer se velike ploče ponašaju poput jedra i vjetar bi ih mogao bacati okolo i time otežati montažu.
- Udaljite djecu i kućne životinje od mjesta rada kako vam ne bi odvraćali pozornost i da ne dođe do nezgoda.
- Ne oslanjajte se punom tjelesnom težinom na krov kućice.
- Prije nego što počnete s prvim koracima u montaži dijelova, morate izgraditi temeljnu ploču i upotrijebiti sustav za usidravanje.

## MONTAŽA

- Najbolja lokacija je mjesto s ravnom površinom i dobrom drenažom.
- Ostavite dovoljno prostora radi lakšeg postavljanja dijelova za vrijeme montaže na svoje mjesto.
- **Timski rad:** Kad god je moguće, montažu kućice treba zajednički obavljati dvoje ili više ljudi.

## BRIGA I ODRŽAVANJE

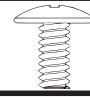

- NEMOJTE čistiti kućicu električnim strojevima za pranje.
- Zapaljive i nagrizajuće tvari moraju se skladištiti u hermetički zatvorenim spremnicima namijenjenim za skladištenje kemikalija i/ili zapaljivih tvari. Korozivne kemikalije poput gnojiva, pesticida i herbicida trebaju se odmah očistiti s unutarnjih i vanjskih površina. Hrđa uzrokovana kemijskim oštećenjima nije pokrivena jamstvom.

## MJERE ZAŠTITE OD HRĐE

- Izbjegavajte urezivanje ili struganje površine premaza, iznutra i izvana.
- Očistite otpad s krova, perimetra osnove i vrata.
- Što prije izgladite ogrebotine ili ureze i bilo koje područje s vidljivom hrđom.

# POPIS SPOJNOG MATERIJALA

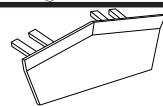

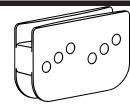

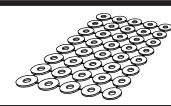

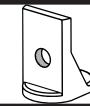

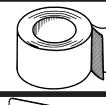

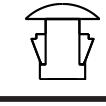

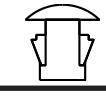

CR,SN-05IJ

Ključ br.	Broj dijela	Opis dijela	Kol.	Pregledi spojnog materijala po broju ključa
1	65103	šesterokutna matica (# 8-32)	63	
2	65923	mali svornjak (#8-32 x 3/8) (10 mm)	63	
3	65004	mali vijak (#8AB x 5/16) (8 mm)	184	
4	65900	crni vijak #10Bx1/2" (13 mm)	8	
5	65109	slijepa matica #8-32	6	

Spojni dijelovi koji se koriste u svakom koraku prikazani su stvarnom veličinom na vrhu svake stranice. Ako niste sigurni koji spojni dio trebate koristiti, upotrijebite onaj koji odgovara slici.

# IZGRADNJA TEMELJNE PLOČE

drvena platforma

betonska ploča

## \* VAŽNO \*

Osnova MORA biti ravna i niveliрана kako bi osigurala odgovarajuću potporu vašoj kućiци, u suprotnom se **PRETHODNO IZBUŠENE RUPE NEĆE PORAVNATI I MONTAŽA SE NE MOŽE IZVRŠITI**. Bez obzira koju od dolje navedenih opcija odaberete za vašu osnovu, preporučuje se KOMPLET ZA SIDRENJE ARROW kao učinkovita metoda za pravilno osiguranje vaše kućice nakon dovršetka montaže.

### OPCIJA 1: Izgradnja izravno na tlu

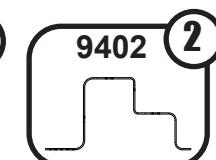

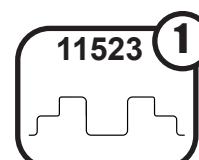

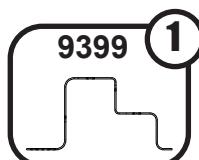

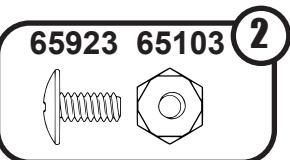

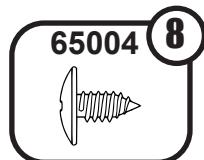

### OPCIJA 2: Drvena platforma

**NAPOMENA:** Drvna građa obrađena pod tlakom NE smije se upotrebljavati na mjestima na kojima će doći u dodir s vašom kućicom. Svojstva drvene građe pod tlakom uzrokovat će ubrzani koroziju. **Ako drvna građa obrađena pod tlakom dođe u dodir s vašom kućicom, jamstvo će se poništiti.** Platforma bi trebala biti niveliрана i ravna (bez izbočina, grebena, itd.) kako bi činila dobar oslonac za kućicu. Potrebeni materijali mogu se nabaviti u lokalnoj trgovini drvene građe.

### OPCIJA 3: Betonska ploča

Ploča mora biti debljine najmanje 10,2 cm (4").

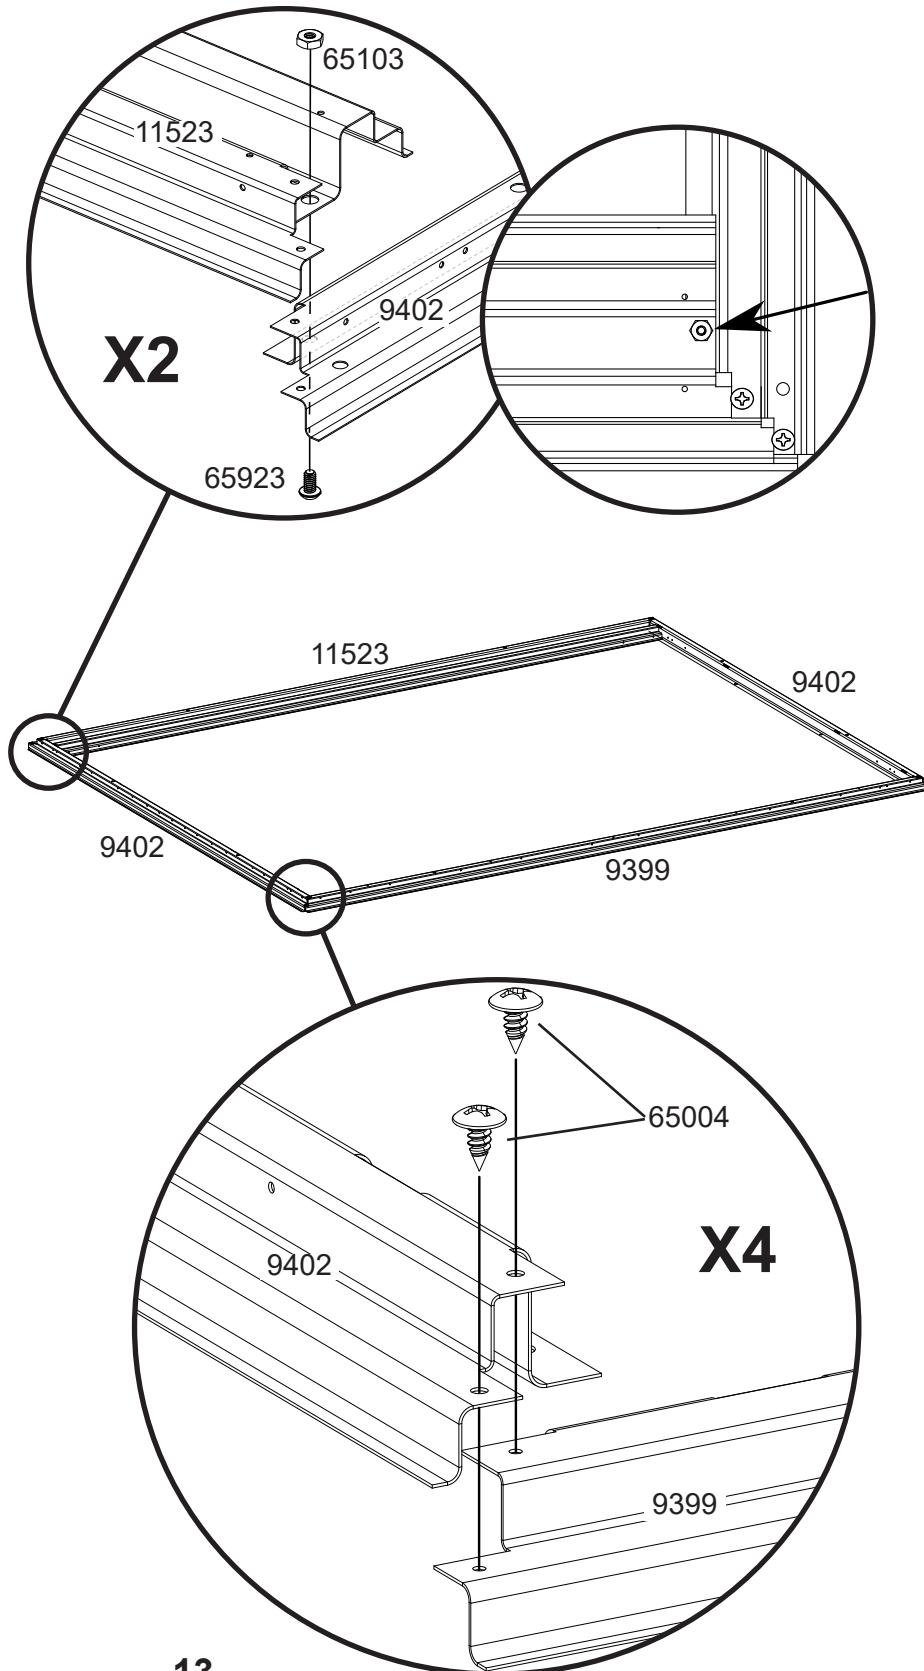

# 1: PODNI OKVIRI

**NAPOMENA:**

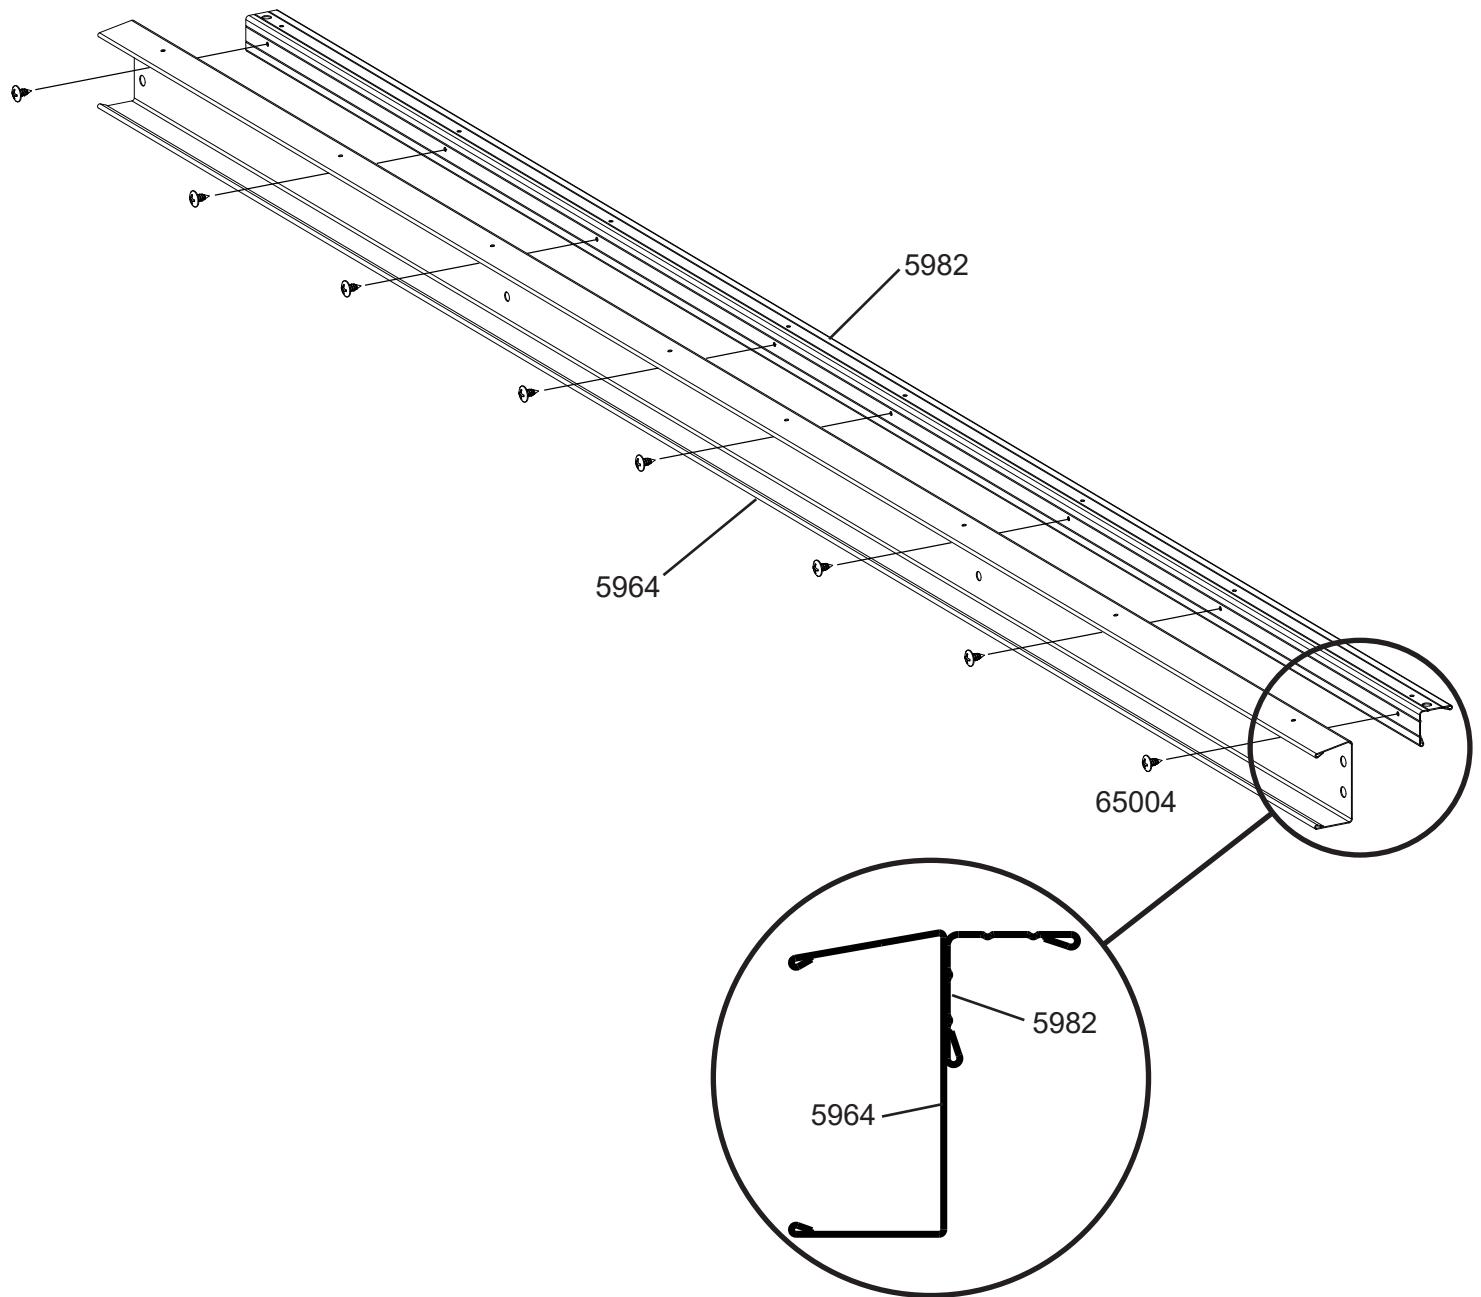

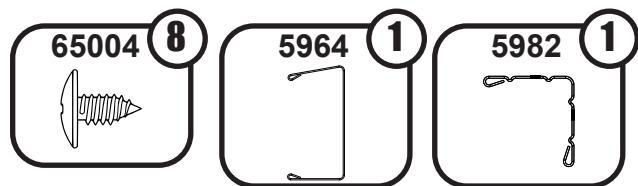

u ovom trenutku ne pričvršćujte podne okvire na bazu. Pričvrstit ćete kućicu nakon njezina podizanja.

Podni okvir mora biti pod pravim kutom i niveliiran ili se otvor i neće poravnati.

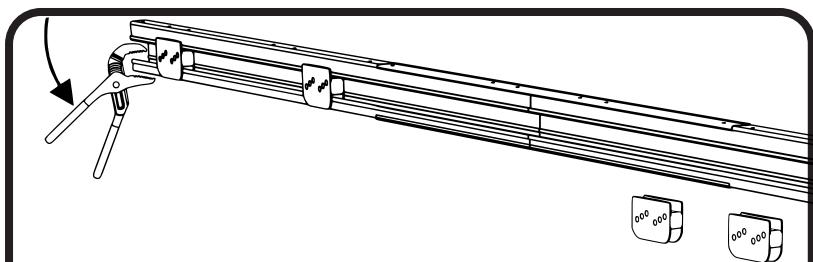

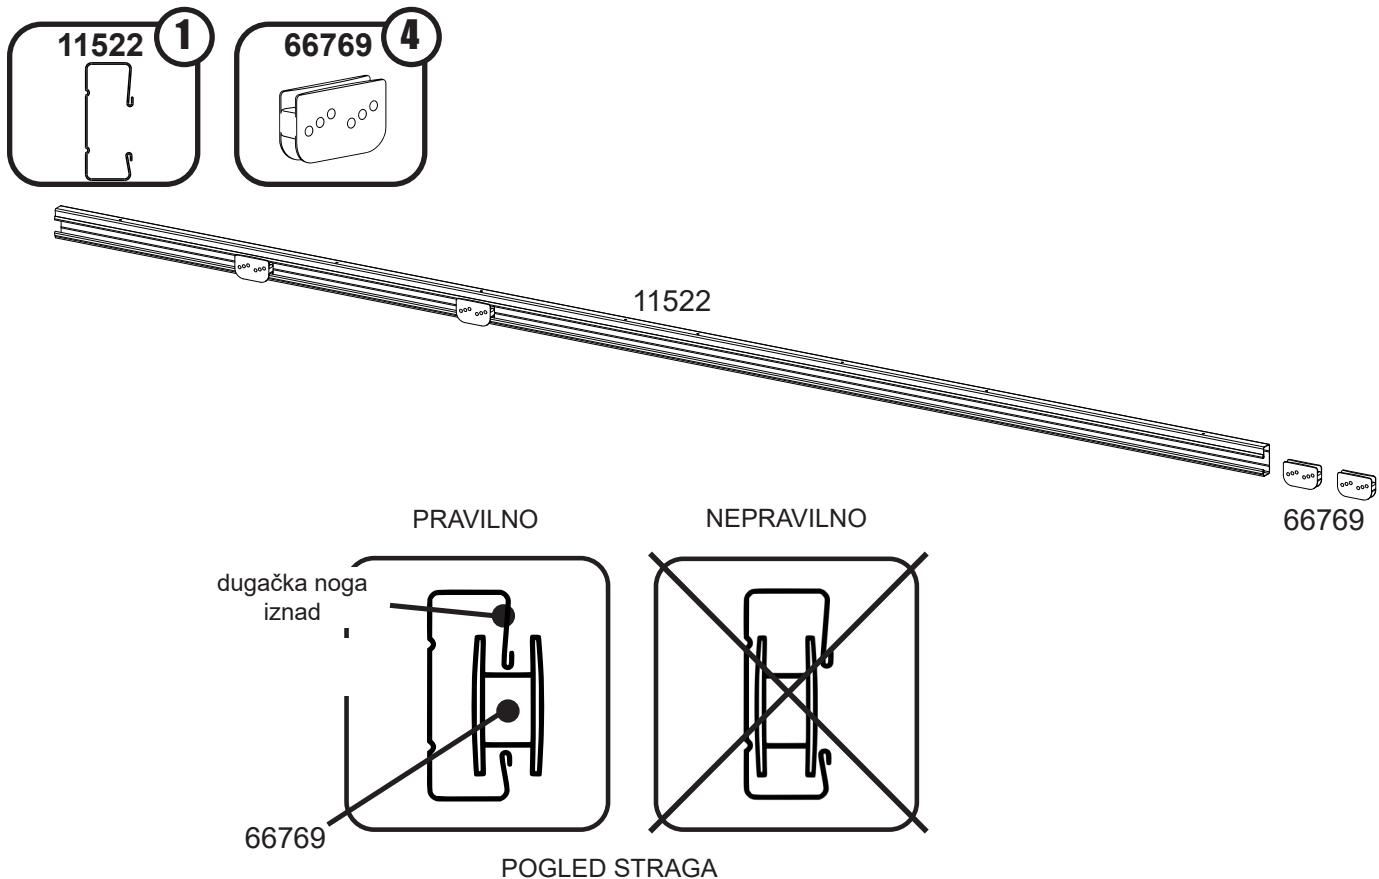

Kada su mjere diagonala jednake, podni okvir je pod pravim kutom.

## 2: PRIPREMA ZA MONTAŽU

## 2: PRIPREMA ZA MONTAŽU

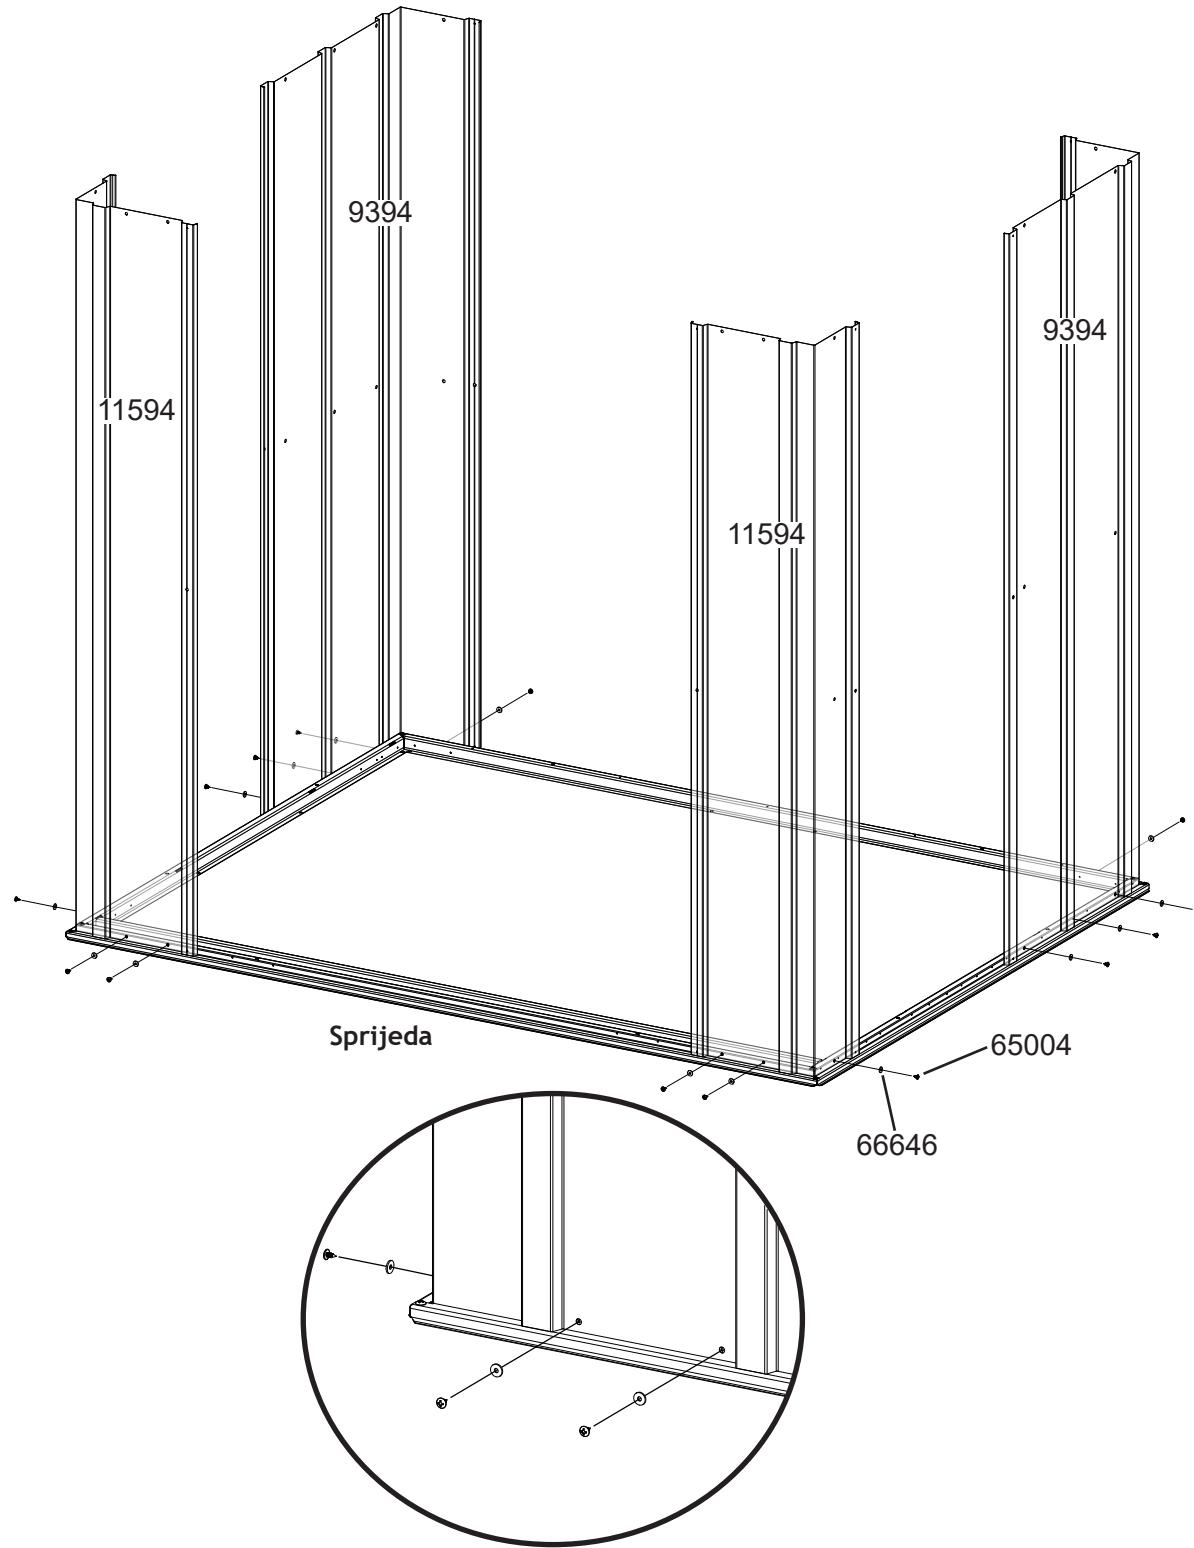

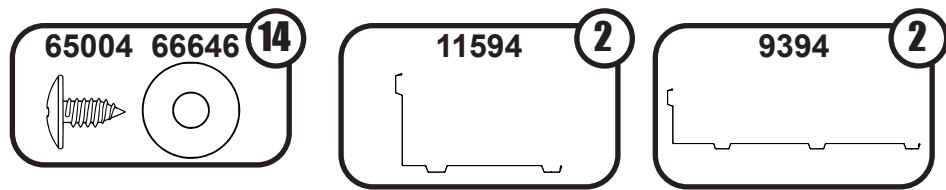

Prije instalacije potrebno je instalirati klizače u vodilicu vrata. Međutim, ako se ovaj korak zanemari ili ako se klizači moraju ukloniti radi održavanja, možete prijeći na sljedeći korak.

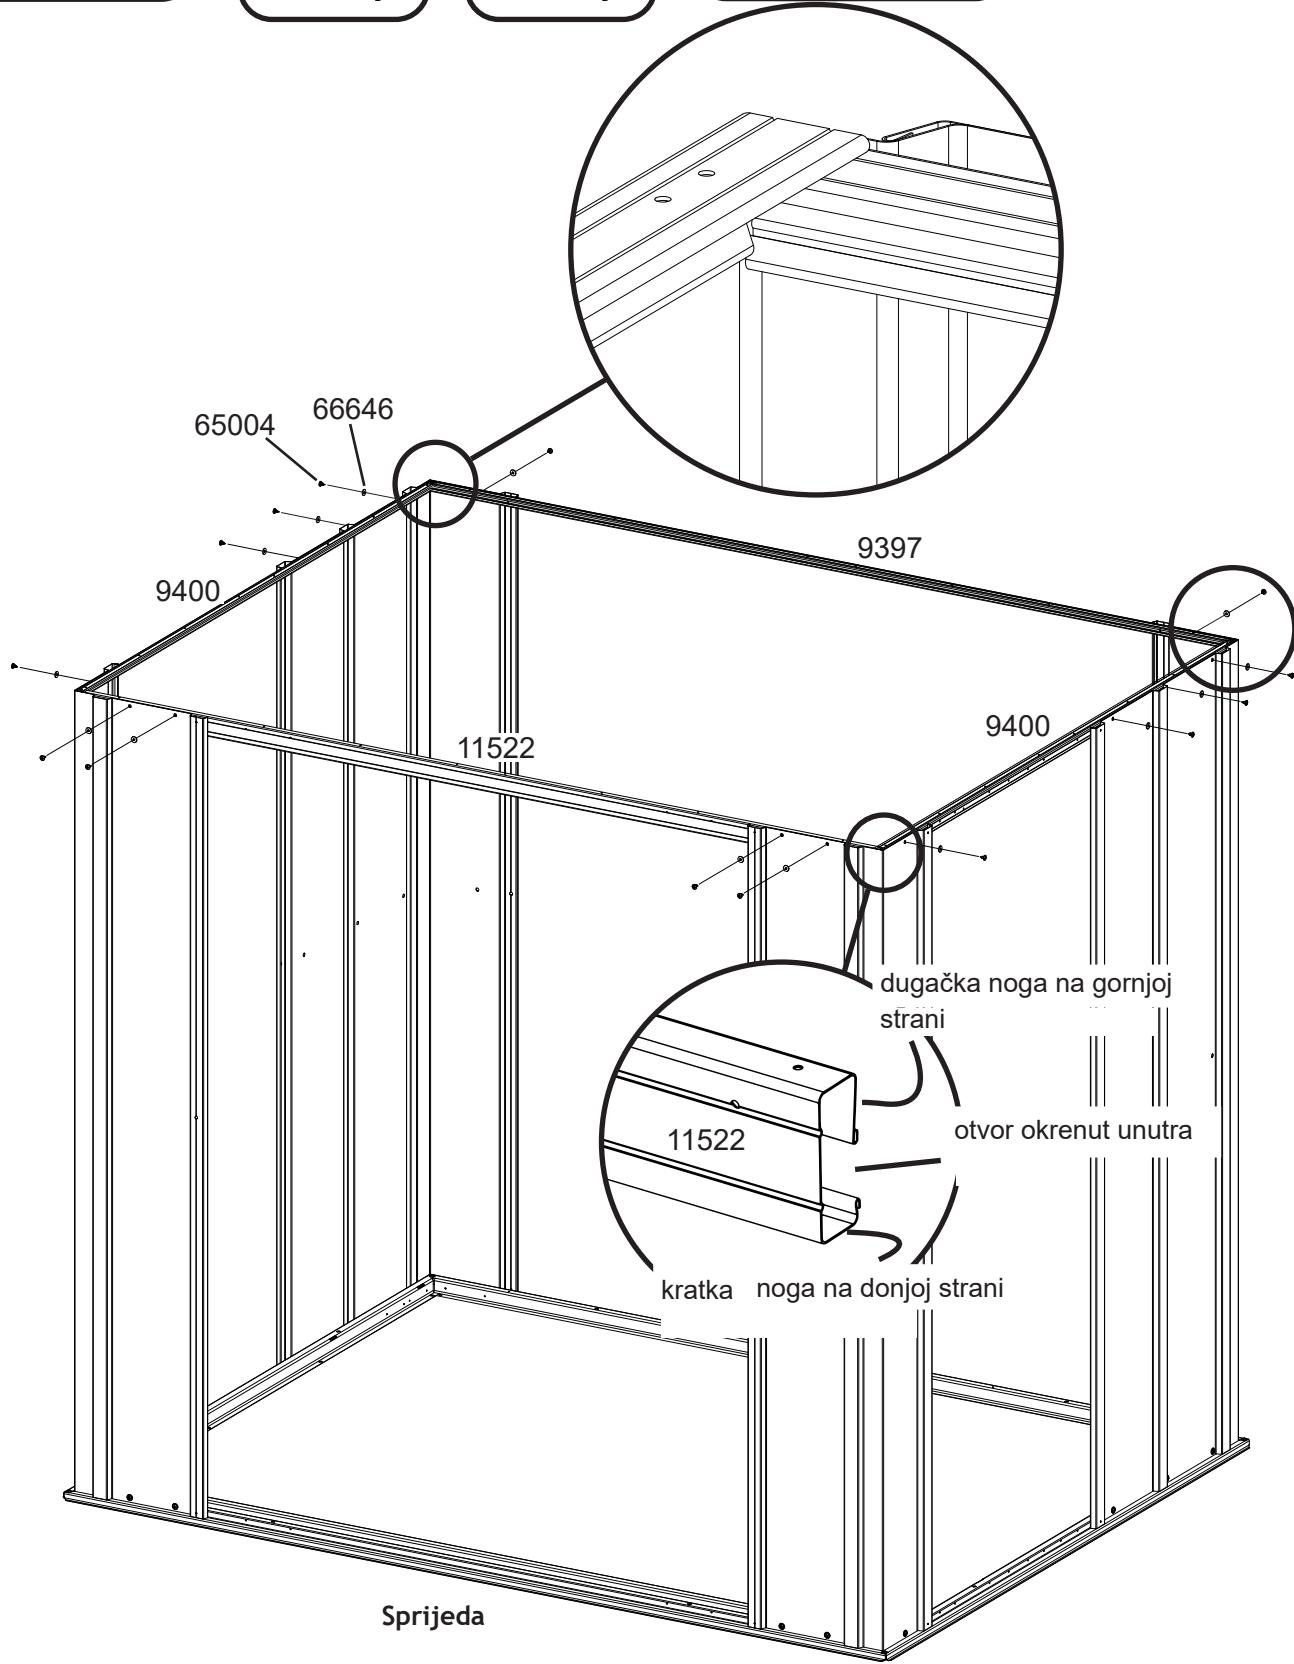

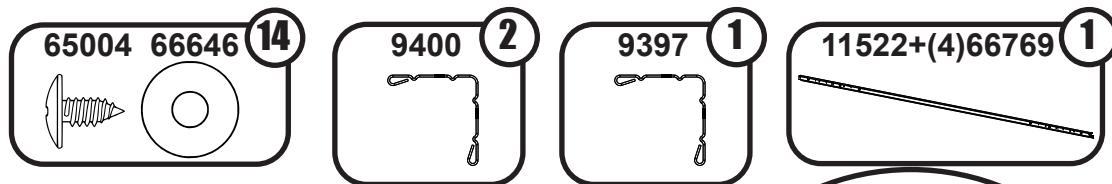

### Za uklanjanje ili instaliranje klizača vrata:

- Uklonite vrata s klizača i ostavite ih sa strane.
- Klještimu savijte prema dolje kut vodilice vrata.
- Uklonite ili instalirajte klizače vrata.
- Pažljivo savijte kut natrag na njegovo mjesto.

## 7: KANAL ZIDA

## 8: ZABAT

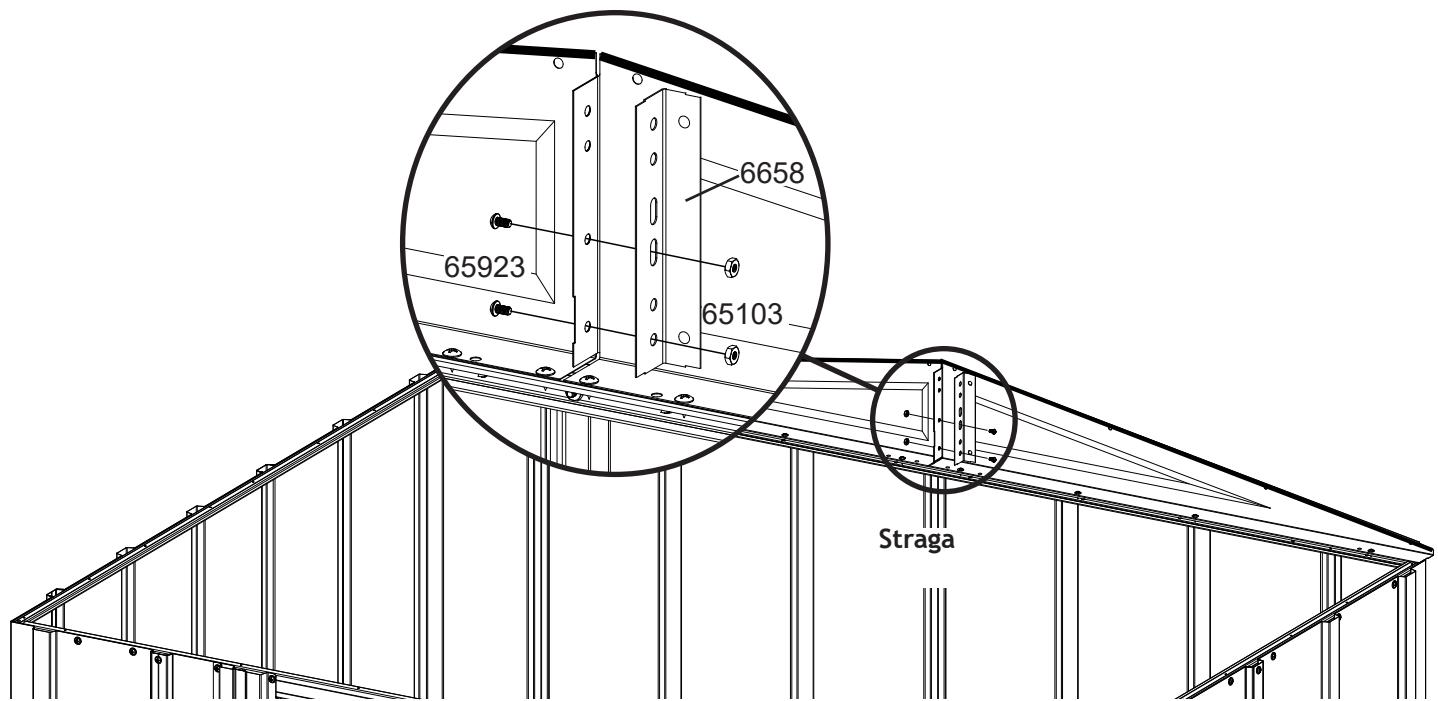

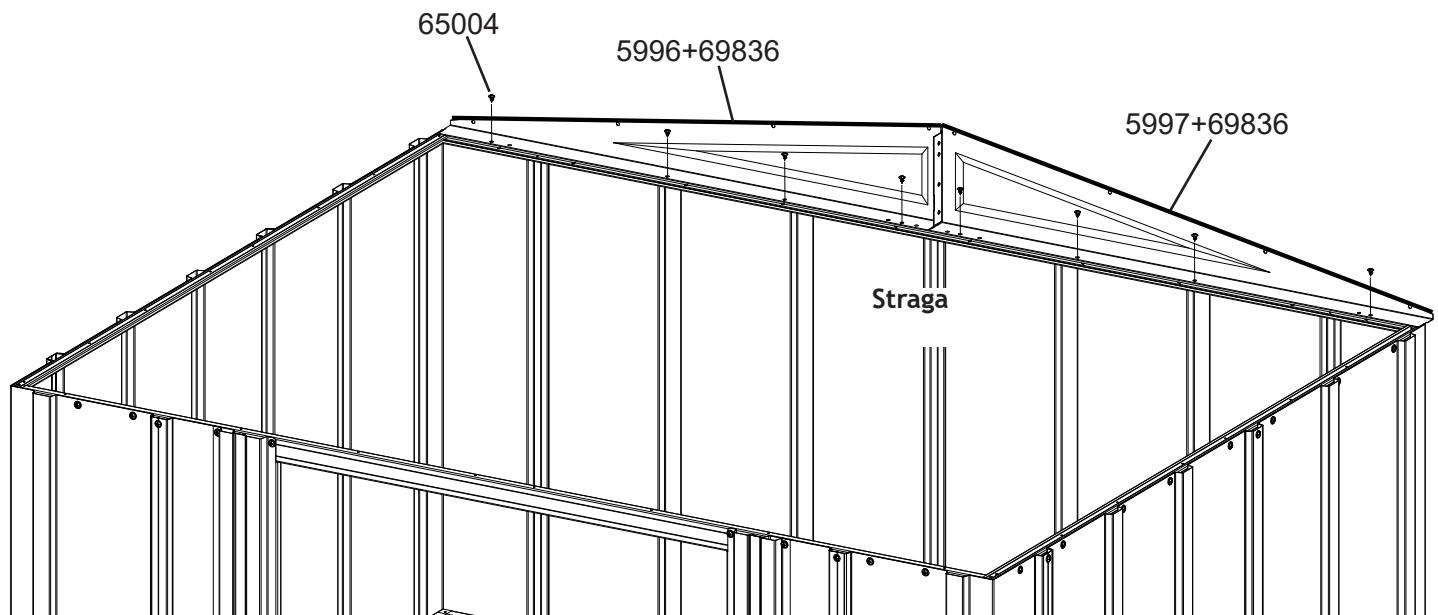

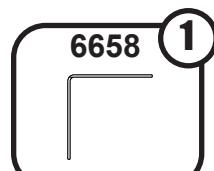

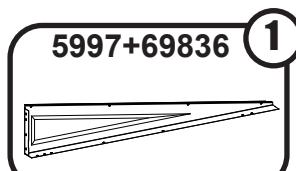

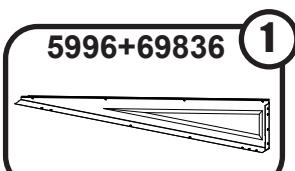

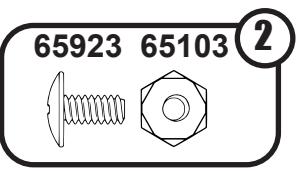

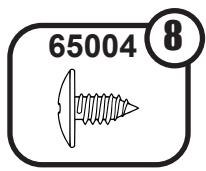

### OPREZ:

Kako biste izbjegli nezgodu na oštrom rubu,  
obrub mora ostati na mjestu na gornjem rubu  
zabata sve dok se desna i lijeva krovna ploča  
ne postave na svoje mjesto.

# 12: SKLOP VRATA

## Podešavanje vrata

Ako vrata nisu poravnana, podignite ili spustite jednu stranu vrata postavljanjem vijaka za vrata kroz različite rupe na klizaču vrata.

# OPCIJE SIDRENJA

## \* VAŽNO \*

- *Ako imate krilna vrata, morate ih objesiti i nivelirati netom prije sidrenja kućice.*
- *Sada usidrite kućicu. Koristite odgovarajuću opremu za duljinu od 6 mm (1/4") X najmanje 38,1mm(1 1/2") dužine hardvera.*
- *Odvojite trenutak kako biste bili sigurni da je kućica instalirana u skladu s ovim uputama i sa svim važećim propisima.*
- *Nakon podizanja kućice cijeli podni okvir MORA biti sigurno pričvršćen.*
