

Diesel Stop Smoke

Description

STP Diesel Stop Smoke has been specially formulated to significantly reduce exhaust smoke in diesel vehicles by helping to keep the system clean.

Using STP® Diesel Stop Smoke – Features & Benefits

- Reduces black smoke and exhaust and noxious emissions within 1 hour
- Improves fuel consumption

STP Diesel Stop Smoke:

- Is safe to use with other STP additives
- Is safe to use in vehicles fitted with a catalytic converter or turbos

Directions for Using STP Diesel Stop Smoke

One bottle of STP Diesel Stop Smoke will treat 50-60 litres of diesel fuel, and should be added directly to a full tank. For best results use every 1250 miles/2000 km.
