Lieferumfang

Freischneidermesser – 1 Stück	
Extrastarker Faden 37 cm – 3 Stück	
Karton	

Achieve excellent results and ultimate garden control with 1000 W of power.

The AFS 23-37 brushcutter, equipped with 1.3 horsepower, allows you to manage your overgrown garden with ease.

Exchangeability between blade and line mode gives you the freedom and flexibility to deliver effective cutting throughout your garden.

A dual-cutting system allows you to overcome any challenge. The strong cutting line tackles green vegetation such as coarse grass and nettles. Whereas the metal blade is perfectly suited to tackling woodier applications such as brambles, small bushes and saplings.

The aluminium motor housing and robust materials used ensure a durable tool with longer lifetime. An ergonomic auxiliary handle and shoulder belt create a well-balanced machine for comfortable work.

Brushcutting of medium to larger-sized gardens

Tackle longer grass

Cut back nettles, brambles and saplings
