TABLE SAW 2000W

Lay your wooden boards comfortably on the large table of this Powerplus table saw and work on an ergonomic working height of 917mm. With 2000W power and a rotation speed of 5000min⁻¹ you make straight and cross cuts in wood. You get perfectly sawn wider boards, as you even have the possibility to extend the large table on the right. The device can easily be moved to the right place thanks to its wheel support.

You can easily adjust the angle and height of the Ø250mm saw blade. The mitre gauge fence and parallel guide give you the opportunity to make very accurate parallel cuts in wood up to 85mm thick and mitre cuts up to 60mm deep. A push stick and a saw blade guard guarantee your safety while sawing and the overload protection avoids overheating. You can attach the dust extraction outlet to a vacuum cleaner to guarantee a clean, dust-free working environment. Fold the table saw after use.
