quantity of one Wooden pallet allowed	example image	example image	example image	reason
<p>1.Can be stacked in 2 layers,with 6 fans per layer .total 12pcs per pallet</p> <p>2.Height of 1.7 meter per pallet</p> <p>3.It is necessary to wrap the fan with protective film to prevent it from tipping over.</p>				<p>Stacking should be in the same direction and cannot be placed upside down. Because the base at the bottom is heavy.</p>

correct loading way	correct loading way
correct example image	
  	<ol style="list-style-type: none"> 1. Each fan must be stacked upright on the front side, 2. as the base weighs 8kgs and must be at the bottom, 3. cannot be stacked upside down. Otherwise, the grille will compress and deform. 4. If a fan needs to be placed flat on top, it can be stacked up to two layers
