## Installation

Make sure that the distance from walls and objects is respected.

- A. Put the hanging rack on the wall as a guide ruler (please make sure the holes at parallel level), use a mark pen to mark the hole position
- B. Drill holes on the wall with  $\phi 8\text{mm}$  drill bit and insert the plastic wall plug
- C. Fasten the hanging rack on the wall with the screws, do make sure the hanging rack is in correct direction
- D. Gently insert the heater body of the bottom to the hanging rack first and then push the heater body to

be hooked on the whole hanging rack

**Warning: Be sure to keep the distance between the heater and floor, wall and so on at least 30cm.**

**Warning! When drilling holes, always check to ensure there is no wiring, pipework, etc. in the area to be drilled.**

**Warning: Before plugging in the unit make sure the radiator is properly attached to the wall. Otherwise problems can occur.**

Put the heater on a flat, dry and clean surface. Install the feet as shown on the below drawing.
