

Ratchet Tie Down Technical Data Sheet

Model No#: 442

DESCRIPTION:

DETAIL DISPLAY

1. Widen and thickened binding strap

It has no elasticity, water absorption, strong adaptability, and is not easy to break. It can effectively prevent corrosion caused by long-term sunshine and rain.

2. Double row hook

The binding is not easy to fall off, and the easily accessible traceless radian is not worried about the scratches of the goods, the breakage and falling off of the hook

3. Simple operation

The operation of the new tensioner is simple. You don't need to use brute force to pull the goods. You only need to have a tensioner, saving time and effort!

Installation Instructions

1. Pass the webbing under the tensioner shaft.
2. Put the webbing through the center groove of tensioner shaft.
3. Pull the tensioner handle back and forth

Disassembly instructions

1. Fasten the fuse out-ward.
2. Open the tensioner to the horizontal position.
3. Pull out the webbing.

PRODUCT SPECIFICATIONS:

Length	4.8m
Width	25mm
Lashing Capacity	250daN
Certificate	TUV GS
