

Booster Cable Technical Data Sheet

750A

Model No#: 95750

DESCRIPTION:

When your diesel truck, tractor, car, truck, motorcycle or other vehicle needs a boost, you'll be ready with booster cables. Booster cables are an important safety accessory for any vehicle.

Connecting instructions

1. Carefully connect one RED (positive +) cable end to the positive (+) post of the dead battery.
2. Carefully connect the other positive (+) end to the good battery.
3. Connect one black (negative -) cable end to the negative (-) post of the good battery.
4. Connect the other negative (-) end to an engine ground (NOT connect to negative post of dead battery) .
5. After starting, carefully remove the cables in the reverse order.
