MEISTERHOLZ THERMO EXTRA

The **MEISTERHOLZ THERMO EXTRA** loft ladder is characterised by a single seal and a 46mm thick hatch. The **MEISTERHOLZ THERMO EXTRA** model is ideal for conditions where the loft is poorly insulated and requires additional thermal insulation. The excellent quality of the materials used in the production of the staircase, as well as the attention paid to every detail of the finish, mean that the staircase will satisfy even the most demanding customers, and its maximum load during use is up to 150 kg.
