POWXG6611

WEED BURNER 2000W

This electric weed burner kills all weeds without making use of chemical pesticides, gas or open flame. Within 5 seconds, the high temperature flame of 600°C breaks down the weeds. A long aluminum tube of 105cm makes it very user-friendly and ensures a maximum safety.

The weed burner can also be used to quickly and safely light a barbecue or fireplace. For that purpose, the long handle can be detached and the weed burning nozzle can be replaced by the BBQ lightning nozzle.

After use, the weed burner can be placed on the convenient support for it to cool down in all safety. The POWXG6611 is delivered with a nozzle for weed burning and a nozzle for lighting the BBQ / fireplace.
